

truMe

Global Identity and Access Management System

truMe *for* Visitors' Management in Government Organisations

Present Challenges

Security

- Overwhelming dependence on manpower and legacy systems
 - Need vigilant and trained workforce; therefore expensive
 - Little flexibility to design access rules
 - Methods to establish identity not too sound
 - No differential access regime
 - Heavy handed security interface but no real access control
-

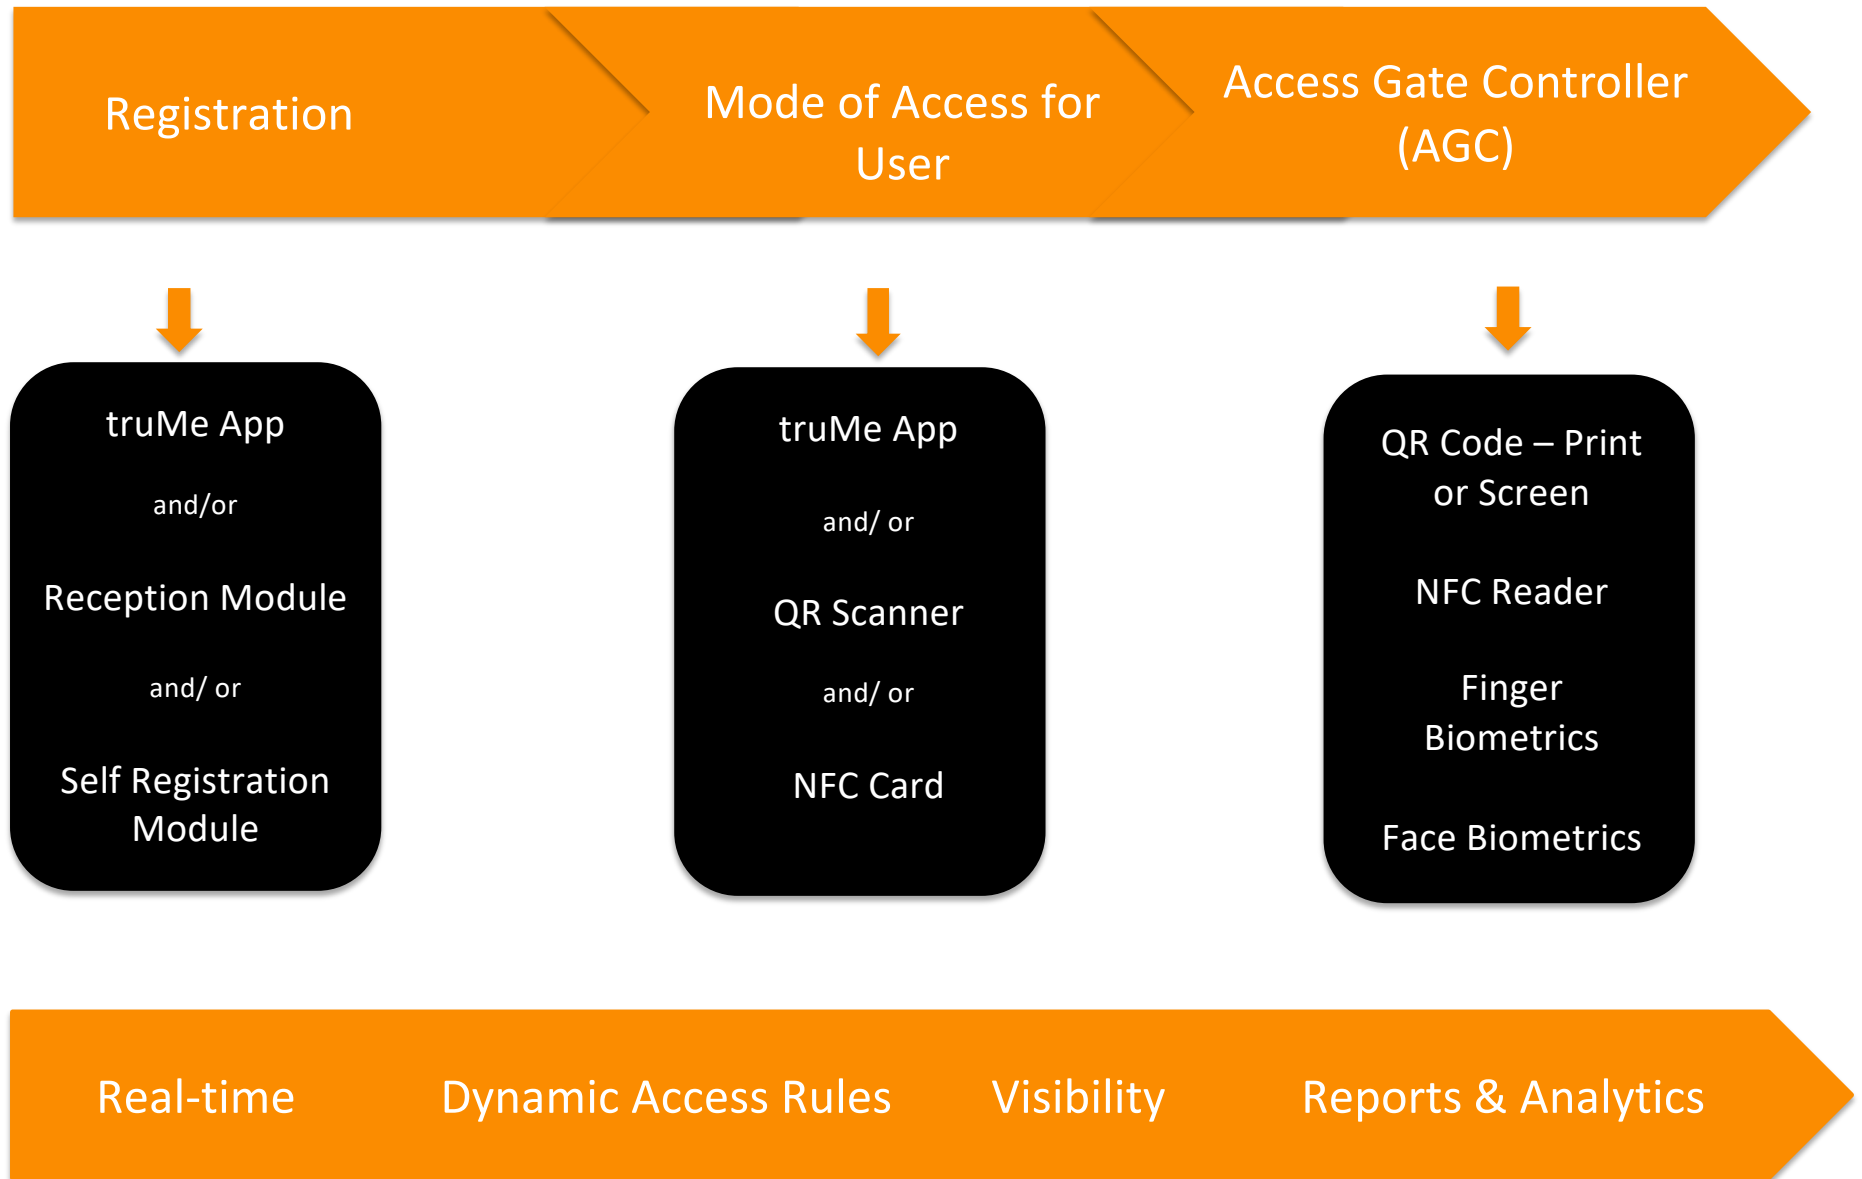

Visibility

- Records not easily retrievable
 - Poor visibility on visitors movement inside the premises
 - Physical visibility has limitations
 - No tracking; No data analytics
-

Convenience

- Unpleasant Entry Experience – Visitors feel unwelcome and hassled
 - Obtrusive, Inconvenient and Insecure access management
 - Queues – Friction – Paperwork
 - Time-consuming processes
- 

truMe Platform

truMe: Value Proposition

State-of-the-art Solution

- Multiple options to register a visitor away from location, making hassle-free, secure entry possible
- Individual offices/r can invite own guests, reducing load on reception
- Complete visibility on visitors' movement
- Auto-generated customized reports to Security Officer
- Security Officer can get live visibility on a particular location/ person
- Great flexibility to write access rules; Real-time implementation
- Employees, temp staff and visitors, all can be on the same platform
- Unlimited users on one platform
- 1,2,or 3 level authentication available
- In-built Emergency Response system

Compelling Cost- efficiency

- Very low staff/ security guard requirement
- No expense on printing slips for visitors
- Reduction in hardware cost
- No NFC cards required for employees and temp staff
- Integration with BMS helps save on energy consumption
- Low maintenance
