

truMe

Global Identity and Access Management Platform

truMe for Hot Desking

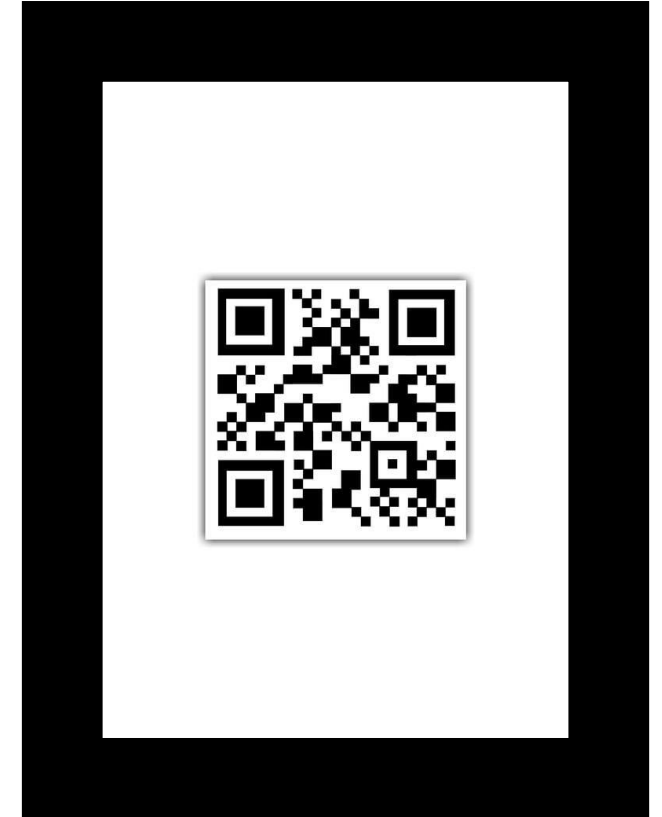

truMe: An Introduction

truMe is an IoT based Identity & Access Management Platform. It's an elegant and cost-effective solution to the various access related questions. truMe leverages a number of technologies to create products that are extremely easy to use both for the establishments and the individual users. Unlike the legacy Access Management Systems, which are standalone and are completely dependent on hardware, truMe is a state-of-the-art platform, which ensures great flexibility to write access rules, gives real-time visibility to access events and has in-built reporting & data analytics.

truMe Hot Desking: How it Works

- Authorized employee books workstation on her App
- A workstation is automatically allotted to the employee as per rules/ specifications/ approval hierarchy
- As the workstation slots get filled, the system does not allow any further booking
- Notification to Users and approvers on email as well as App
- At the entry point, Employee scans a QR code - pasted or displayed on a tablet - to check authorization
- The status of authorization is instantly visible on the tablet
- On need basis, access to workspace can be controlled as well. The door opens only for an employee authorized for the day

The truMe Advantage

- Orderly, uninterrupted and productive use of the work-spaces
- Option of booking work-space in advance for any period
- Two-way communication between User and Approver
- Choice of interfaces – QR scan, RFID reader, Face Recognition
- Advance analytics & reports on allocation, access and usage
- In-built Attendance Management
- Option of Access Control available
- Covid-19/ Health details of employees available realtime
- Realtime visibility on allocation and usage of the work-spaces across departments/ offices/ locations
